### Skills \_\_\_\_\_

JavaScript | NodeJS | PHP | MySQL | PostgreSQL | MongoDB | SQLite | jQuery | React JS | Vue | Express | Git | GitHub | Automation | Quality Assurance | SCRUM | Angular | MY SQL | SQL Server | Full Stack Development | TeamWork | Svelte | Adaptability | object-oriented programming | Problem Solving | DSA | Scalability | MERN Communication | English, Hindi, Urdu

### Experience \_\_\_\_\_

**Expert Frontend React Developer** Devline Sololutions 09/2024 – 5/2025

<https://www.devlinesolutions.com/>

#### Roles and Responsibilities:

- Utilize Typescript and JavaScript in React.js platform to build front end framework.
- Worked with other members of web team to design and develop exciting features using JavaScript.
- Kept up-to-date on best practices for JavaScript frameworks and techniques.
- Experience on modular programming, developing reusable front-end components (headers, bodies, footers and so on) using React.js.
- Revamped and optimized responsive web application design of UI, UX with HTML5, CSS3 and UI libraries incClaireding **Tailwind** and Material UI.
- Designed multiple pages with different functions using React.js and used React-Router to navigate these pages (Product list page, Product details page, Product creation and edit pages, customer cart page and customer login page) with user-friendly flow when switching.
- Used React Hooks to use state and lifecycle methods inside functional components to decrease complexity and improve maintainability and extensibility of system.
- Used Lifecycle Methods, State, Props, Forms and Events to implement interactive React Components.
- Used Redux with React.js in application to retrieve and store data (product list, cart list, and customer information) from NoSQL MongoDB and to perform RESTFUL services.
- Dispatched rich featured Action Creators that deployed Actions, such as displaying all products at homepage, managing items in cart, and editing products.

- Implemented asynchronous actions Thunk as middleware in Redux and used Axios to send multiple HTTP requests.
- Hands on experience using Node.js and Express.js to build backend server connecting to MongoDB database.
- Designed backend server with RESTFUL API for frontend, implemented requests to fetch or manipulate data and user Authentication for login function.
- Hands on communicating with database engineers for data modeling, schema design and connecting to No SQL database, MongoDB.
- Used Git for source control and NPM for JavaScript package management
- MY SQL Performed database normalization, indexing, and query optimization to improve application performance.
- Integrated RESTful APIs with Angular applications, handling data binding, form validation, and user authentication.
- Collaborated with UX/UI designers to create seamless and user-friendly interfaces, enhancing user experience.
- Integrated third-party APIs and services into MVC applications, expanding the functionality and capabilities of the projects.
- Conducted unit and integration testing within the MVC framework to ensure the reliability and performance of web applications
- Implemented authentication and authorization systems in JS to safeguard sensitive user data and ensure proper access control.
- Optimized application performance through caching, queue management, and load balancing, ensuring scalability and efficiency.

**Full stack developer**

**6/2023 - 7/2024**

<https://techitribe/>

As a Full Stack Developer, I've ensuring projects align with goals and exceed client expectations. Specializing in theme development and plugin customization, I leverage HTML, CSS, and JavaScript for visually and functional solutions. Proficient in Frontend, I provide comprehensive support, maintenance, strategic insights, and optimizing website performance

#### **Roles and Responsibilities:**

- Develop and maintain web applications using Js and MERN framework.
- Design and implement RESTful APIs for seamless integration with frontend and third-party services.
- Developed highly intuitive and cool front-end interfaces with React (Class based and functional) while keeping all the best practices of a good design in mind.
- Led full site builds, from initial concept to deployment, ensuring adherence to project timelines and client specifications.
- Debug and rectify website issues
- Specialized in Frontend development and customizations, using knowledge of **HTML, CSS, and JavaScript** .

- Designed responsive mobile-friendly applications based on strategy and client feedback, optimizing user experience across devices.
- Communicated effectively with clients and project managers regarding bugs, updates, and project status, ensuring transparency and client satisfaction.
- Stayed up-to-date with new web technologies and industry trends to maintain proficiency and deliver innovative solutions.
- React JS UI development with components
- MERN full stack development
- Developed and maintained dynamic websites and web applications using PHP, HTML, CSS, JavaScript, and MySQL.
- Provided ongoing support and maintenance for existing js and MEN applications, including bug fixes, feature enhancements, and performance optimizations.
- React JS UI development with components

**Freelancer Part-time      UpWork      01/2021 - Current**

<https://www.upwork.com/freelancers/adeelakhter>

With over 10 years of experience, I've completed 30+ Upwork projects with a 100% success rate. Designed and coded the full project website from scratch. Working a 10+ member team at NoorSofttech agency. With excellent communication and problem-solving skills solve the problems of clients satisfy them and build a long relationship with them.

#### **Roles and Responsibilities:**

- **Completed over 30+ projects** on Upwork with a job success rate by delivering high-quality solutions.
- Designing, and coding a new website for the **Eagle project** using **CSS, HTML, Javascript, and jQuery**.
- Meeting with the prospective clients to review the website, and gather the client requests specifications for new or existing websites.
- Designing and implementing the front end using **HTML5, CSS3, jQuery, ReactJS, and Tailwind**.

**Frontend Developer      WebStones., Pakistan      05/2022 - 10/2022**

As an experienced web developer, I developed multiple websites using modern web standards and technologies like **Tailwind**, HTML5, JavaScript, and CSS3. By optimizing website loading times and conducting daily monitoring of automated tasks and server operations, I've ensured seamless functionality and data integrity.

### **Roles and Responsibilities:**

- Developed multiple websites using **Tailwind** Framework and a combination of **HTML5, JavaScript, and CSS3**, adhering to modern web standards and best practices..
- Designed and maintained websites using **CSS, XHTML, JavaScript, and PHP**, ensuring cross-browser compatibility and responsive design principles.
- Generated performance reports for **teams and individuals**, providing insights for optimization and performance management.

### **Software Developer****District Coordination Office Lahore, Pakistan**    **04/2021 - 04/2022**

Worked as a software and web developer to maintain and build their applications software and servers.

#### **Roles and Responsibilities:**

- Developed web applications using javascript frameworks, ensuring adherence to project requirements and industry best practices.
- Conducted daily record management tasks in the database, maintaining **data accuracy** and **integrity**.
- Provided maintenance and development support for the database, including **schema updates, performance optimizations, and data migration tasks**.
- Designed and coded a new website for the Eagle project, utilizing **CSS, XML, JavaScript, and jQuery** to create a user-friendly website.

### **Education \_**

#### **University of Engineering and Techonology, Lahore, Pakistan 2020-2024**

Bachelor's in Computer Science (BSCS)
